

**ViewRay Chief Science Officer, Jim Dempsey,
to Present to NIH**

ViewRay, Inc. announced today that Jim Dempsey, the Company's Chief Science Officer, has been invited to Washington D.C to present the ViewRay technology to a range of NIH interdisciplinary centers including NIBIB, NCI, NCRR, and the NIMH among others. The purpose of the meeting is to facilitate the exchange of imaging research and initiatives among these Federal centers.

"This invitation to share data with the NIH about what we believe will become the future of image guided radiation therapy is an indication of Jim's exemplary work as well as the promise of ViewRay's technology," states Russ Donda, ViewRay CEO.

The meeting will be held January 10, 2006 and is sponsored by the National Cancer Institute and the National Institute of Biomedical Imaging and Bioengineering.

ViewRay has licensed its patent pending technology from the University of Florida and is solely dedicated to its development and commercialization.
